

About Jangala

We are a technology charity providing essential internet access worldwide and in the UK.

We focus on bridging the digital divide and have connected thousands of individuals to the internet.

What is a Get Box?

Get Box is a mobile Wi-Fi device that provides internet access where you are.

It's portable and works just like a hotspot from a smartphone or a broadband router.

Jāngala

Our Get Box UK programme

We partner with organisations in the UK to provide Get Boxes to connect people to the internet.

Each Get Box comes with a SIM card that provides 25GB data per month for 12 months.

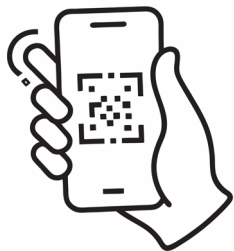

Please note: the data balance on your Get Box will renew on the **22nd** of every month.

What if I need support?

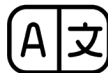

If you have any questions, or if you need help with installation, please contact the organisation who gave you or installed the Get Box.

There are instructions included in your box but you can also access them online using the QR code on the back of this leaflet.
